 Error	Ready					

Error The last sign was incorrect. The next one will replace it.
Ready End of a word. Spacing between repeated letters. The receiver uses it to designate he/she is ready.
The signs are formed in the same plane as the shoulders of the Sender, arms and staves at their full extent, forefingers along the staves. When at the Ready position the arms should hang straight from the shoulder. The semaphore arms must be placed at the exact position indicating the letters or signs, the arms being moved from sign to sign by the shortest route; a distinct pause being made at each sign, according to the rate of sending.
